

Installation:

- Ubuntu version: 18.04.1
- bWAPP version: 2.2
- Python version: 2.7.15rc1
- Server: LAMP stack (Note: Script should work just fine on bee-box, and the server installation shouldn't matter)
 - Apache version: 2.4.29
 - Mysql version: 5.7.24
 - PHP version: 1:7.2+
- Python external libraries
 - bs4 (Beautiful Soup)
 - requests (HTTP Requests)

Packages can be installed (in Ubuntu) with

`apt install <package>`

Python libraries can be installed with

`pip install <library>`
